

# Mandriva Instant On OS

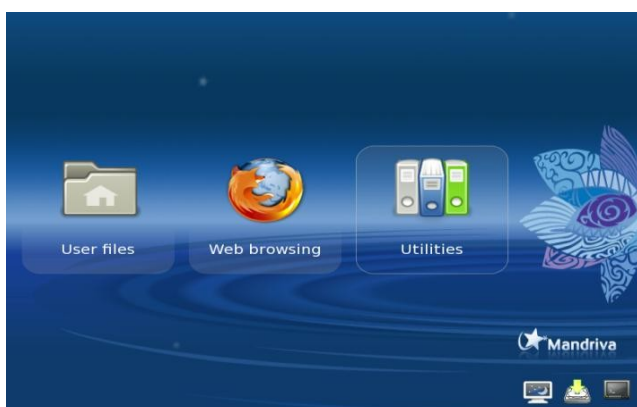

What about starting your computer in less than 10 seconds?

## Fast system boot

10 seconds to start your computer? It is now possible thanks to Mandriva Instant On.

Instant On does not need the entire system for you to use the common applications. It offers you a light and secure system consisting of the main functionalities, in order to be immediately operational.

## Customized and innovative

Mandriva Instant On also enables you to customize your interface according to your company's identity. You can choose among more than 20 000 applications available to build a unique interface matching your needs.

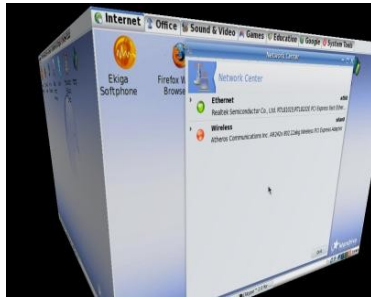

Providing you with better power and memory management, Instant On can be used both with a Linux system or with Microsoft Windows.

With Instant On, listen to music, watch videos anywhere, and enjoy a simple, reliable and secure way to get online.
